

CAMPBELL'S GOLD

Beeswax Candle Making Workshop Saturday April 4, 2009

Pure beeswax candles, with their delightful sweet fragrance, burn longer, more clearly, and give off more light than any other candles. One full sheet of honey comb when rolled into a candle burns approximately eight hours. Half a sheet, when rolled into a candle will burn approximately 4 hours.

9:00 – 11:30 Basic Course – learn basic beeswax sheet rolled candle techniques and walk away with candles made from 2 sheets of beeswax (e.g. 2 sets of 2 candles, or a combination of candle sizes using 2 sheets of beeswax)

1:00 – 3:00 Advanced Class – make one set of rolled, tapered and fluted candles – using 2 sheets of wax – some experience in working with rolled beeswax candles is an asset.

**Pre-paid registration preferred
\$10.00 per person per workshop**
